

The figure displays a hierarchical clustering dendrogram at the top, a heatmap below it, and a color scale on the right. The heatmap has 81 rows and 8 columns. The color scale ranges from 0 (blue) to 40 (red). The dendrogram shows hierarchical clustering of the rows. The heatmap shows a clear pattern of high values (red) in the first two columns and low values (blue) in the last two columns.
